

## Folding and Packaging Machine

## Features

The SPEEDY - T is a folding and semi-automatic packaging machine. This product is indispensable for a fast and uniform folding of T-shirts, sweaters, hoodies and other garments. The blades are interchangeable, very easy to adjust and adapt the fold to the required size, changing in few seconds the set-up from baby t-shirts to extra large sizes. The factors of its success are the reliable fold quality combined with its heavy-duty production capability. It can be adapted to suit all shapes and sizes available on the market.

SPEEDY - T can operate in two ways:

- stacking mode: each folded garment is placed on the stacker, which descends automatically; a photocell indicates when the stack is at its maximum load and stops the machine.
- packaging mode: at the end of each work cycle the garment remains on the last blade, which is lifted up, and it can be easily packed in a bag.

The electronic control device allows the following functions:

- 10 folding programs
- customization of folding programs
- self-diagnostics of anomalies and faults
- production count and report when has reached the preset number of pieces
- hourly production programming with acoustic signal for productions below minimum threshold setting
- multilingual selection (Italian, French, English, Spanish, German)
- reset function

Stacker Mode with automatic photocell

Packaging Mode with ergonomic lifting blade

easy to use with foot pedal or start button

adapt various blade size to garment requirements

fold XS to XXL, long sleeved, with hoodie

customize on demand folding programs

automatic self diagnostic and production count

TECHNICAL DATA	Speedy-T
Electrical Requirements	230/110V 1P+N+PE 50/60 Hz
Air Specification	50 l/min 6 bar
Power Consumption (max)	230 W
Production with packaging	350 pieces/h
Production with stacker	500 pieces/h
Garment Size (min/max)[mm]	150x180 / 350x400
Dimension (LxWxH) [mm]	1500x710x815
Shipping Weight	90 kg
