FLASH CURE FOR INTERMEDIATE DRYING SYSTEM

OPTIONAL ACCESSORIES

CAVO START

CARRELLO DI SUPPORTO
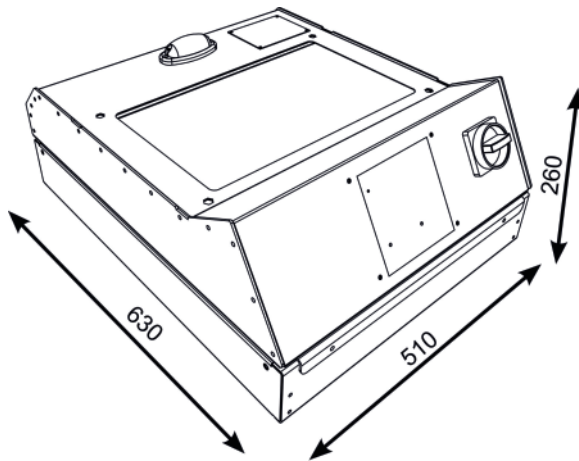

FOTOCELLULA

CE

Magic 25 control panel

Magic 25 dimensions

FEATURES

This product is particularly suitable for use on MHM printing machines.
It ensures easy use, low consumption and high performance.
An IR optics pyrometer instantly detects the ink temperature and stops the heating when the required temperature is reached, thereby preventing the fabric from burning.
The traditional timed system can be used instead of the temperature control.
Magic 25 works with photocell or start cable connected directly in the machine.
It is possible to work with 6, 9 or 12 lamps, with the six central lamps always on.

ADVANTAGES

The air circulation facilitates drying of all kinds of ink.
The 12 lamps contained in Magic 25 are tungsten in vacuum, a special feature which increases the life and switching on speed.
It can be installed in place of the printing panel on all those machines which do not have temporary halt.
By working with temperature control, Magic 25 automatically reduces the switching-on times when the printing tables are heated.

TECHNICAL DATA

TECHNICAL DATA	VALUES
POWER SUPPLY	400 V + N + PE
POWER INPUT (max)	12 kW
LENGTH	630 mm
WIDTH	510 mm
HEIGHT	260 mm
NUMBER OF LAMPS	12
WEIGHT	13 kg
