

PRESS FOR THERMAL PRINTING AND HEAT-TRANSFER MATERIALS

FEATURES

Practical, versatile and easy to use press for heat printing. This model is specially designed for printing on T-Shirts and sportswear, using any kind of heat-transferable material. This press has an electronic controller board with ± 1 °C regulator and Timer with optical and acoustic signalling device.

ADVANTAGES

A set for caps and interchangeable small plates can be mounted easily and rapidly on the press, for application of small motifs. The supplementary plates are available in two sizes: 13 x 12 cm and 15 x 38 cm.
