## TANK FOR DEVELOPING SCREEN PRINTING FRAMES

## **FEATURES**

This tank is designed for the development of screen printing frames. The tank is made entirely of PVC for better resistance against corrosive effects due to the acids used for processing the frames. The tank support frame is made of painted metal. The supply includes a backlight screen. The product is available in various models, depending on the frames used.

MODEL	WORK AREA
VTSV-1	100 X 140
VTSV-2	120 X 160
VTSV-3	150 X 200
